

NATIVE SONS

WHOLESALE NURSERY 2011

**379 West El Campo Road
Arroyo Grande, CA 93420**

Native Sons is a wholesale nursery firmly rooted in California's mediterranean climatic core. We work to provide perennials, grasses, and shrubs that flourish in a climate defined by moderate winter rainfall and warm dry summers. The cyclical drought here asks its gardeners to plant with a respect for water, an open mind, and an air of adventure. Many of the plants we grow are selected in an effort to reinforce this philosophy.

After 30 years in the nursery trade, we continue to pursue and develop new selections with the intention of adding a sense of discovery and exploration to California gardens. Our travels, both at home and abroad, add appealing new species and cultivars to our collection each year through the generosity of friends, plant breeders, and botanic gardens. We offer these plants with a shared regard for the wonder and grace of the natural world. As garden philosopher Allan Lacy has written, "I suspect that more loving and caring people can be found among gardeners than among any other group united by a common interest."
